

Patent and design searching links

JAMES & WELLS
**CHAMPIONS
OF INNOVATION.**

It is always advisable to perform a search prior to filing a patent or design application or manufacturing and marketing new products.

A search will assist in establishing whether a new invention or design is suitable for patent or design protection. Searching can also help in determining whether a product or process can be commercialised without infringing the rights of others.

For more information on the different searching options see 'Patent searching options'.

We recommend conducting your own initial searching prior to instructing our specialised searchers.

The following links are to some of the websites on which registered patents or designs can be searched by using keywords on the appropriate searching, library or online services page for each website.

This list of links is not meant to be comprehensive or definitive, and is just a few of the resources that are available for searching intellectual property rights online.

Australian Intellectual Property Office
http://www.ipaustralia.gov.au/patents/search_index.shtml

Canadian Patents Database
<http://patents1.ic.gc.ca/intro-e.html>

European Patent Register
<http://ep.espacenet.com>

Google Patents
<http://www.google.com/patents>

Japanese Patent Database
